

TUMBLER & BRUSH WASHER

FOR THE M108S TRIMMER

The Mobius Tumbler & Brush Washer takes a sizeable bite out of cleaning your M108S Trimmer. The Tumbler & Brush Washer automatically cleans your AirThread Tension Tumbler and brush bar to a level difficult to achieve manually. Simply attach the tumbler and brush bar to the mounting points, add a mixture of warm water and your preferred cleaning solution to the basin, and switch the unit on. In 5 minutes your AirThread Tension Tumbler and brush bar will be deep cleaned to the same extent as soaking and scrubbing each item for 30 minutes.

REDUCE DOWNTIME, COSTS, AND LABOR

Properly cleaned trimming equipment improves overall product quality and reduces the chance of batch cross-contamination. The Mobius Tumbler & Brush Washer can clean over 10 tumblers in the time it takes to wash one tumbler by hand. Automating this task saves time and money, and makes for a happier sanitation crew, improving employee retention.

INTELLIGENT DESIGN

Overflow holes clearly mark the ideal fill line for water and cleaning solutions while ensuring the basin has the right amount of liquid. The shrouded enclosure keeps hot surfaces away from the operator. Mounted to the underside of the washbasin is an integrated 1.5" brass drain spout with hose connection to easily empty dirty water. Four swivel castors with locks combined with side-mounted handles make the device easy to move and position.

KEY FEATURES

Automatically cleans tumbler and brush bar (no manual scrubbing)

Reduces total clean time from 45 min to 5 min

Full stainless-steel construction

IP67 washdown rated
1/8 HP motor

Easy to access front-mounted controls with emergency stop and auto safety switch

4 swivel castors with locks plus side-mounted handles for easy positioning

1.5" brass drain spout with hose for quick and easy dirty water discharge
