

TD15 & TD25 DRY TRIMMERS

MOBIUS T-LINE DRY CANNABIS TRIMMERS

The T-Line trimmers are designed to be portable, easy to use, and efficient. Constructed with stainless steel and food-grade materials, the TD15 and TD25 are GMP-ready and fully tool-free allowing for quick and easy cleanings. The T-Line batch trimmers are made specifically for dry trimming applications, delivering premium flower and pure, high-quality trim that can be used for secondary processing for extracts and pre-rolls. Add an optional kief kit for optimized trimming and kief collection to double down on productivity.

PREMIUM TRIMMED FLOWER

The TD15 and TD25 are vacuum and lubricant-free, ensuring you produce clean flower and pure trim with each batch and harvest. Using a vacuum-free design, the flower gently tumbles in the drum with our shear band technology, maintaining the integrity of the flower. The trimmer's precise cut delivers hand-trim results on a more efficient scale. The TD15 can trim up to 10 lbs per hour and the TD25 will process 24 lbs per hour. All of the trim is collected during the process and can be used for further processing. With a closed-loop system and no lubricants, the trim maintains its purity for the highest clarity kief and extracts.

REDUCE OPERATING COSTS AND LABOR

Eliminate the hassles of staffing while reducing operating and labor costs and increasing trim consistency across every harvest. The trimmers' intelligent design achieves a seamless loading to trimming to unloading workflow. The efficiency boost from the T-Line` dry trimmers allows for quicker and more consistent trimming than hand-trimming. Deliver better product on a more consistent schedule.

KEY FEATURES

- GMP-ready
- Food-grade materials
- Tool-free disassembly
- Turn-and-lock system for easy drum swaps and removal
- Stainless steel construction
- Rollback easy tilt
- Compact, portable design
- Vacuum and Lubricant-free
- Quiet operation
- Optional stainless steel kief kit
- Built in North America
