

STORAGE & HYDRATION

The tumbler ships with a moisture control pack to maintain ideal ambient conditions during storage & shipment. To reduce the risk of contamination, do not reuse the moisture packs.

Before, between, and after each trim session, the tumbler needs to be stored properly to maintain pliability. Do not allow the tumbler to dry out.

OPTION A: BAG & MOISTURE PACK

Store in a clean plastic bag, either coiled (see *fig. 2*) or full width (see *fig. 3*), with a new moisture pack (see *fig. 1*). Twist to seal the bag. **Do not add water to the bag.**

OPTION B: BAG & WATER

Store in a clean plastic bag, either coiled (see *fig. 2*) or full width (see *fig. 3*), with 10 mL (2 teaspoons) of water. Twist to seal the bag.

OPTION C: SOAK & STORE TUB

Store in a Soak & Store tub (see *fig. 4*). Add 60mL (1/4 cup) of water and keep covered.

Visit mobiustrimmer.com to purchase additional Moisture Packs or Soak & Store Tub.
